**Sanswire Announces New Corporate Headquarters
at Kennedy Space Center**

Location results from relationships with Space Florida and Economic Development Commission of Florida's Space Coast

Brevard County, Fla. (November 19, 2010) – The Economic Development Commission of Florida's Space Coast is pleased to announce that Sanswire Corp., a developer of lighter-than-air unmanned aerial vehicles (UAVs) and related technologies, is relocating its corporate headquarters to a facility located on the ground of Kennedy Space Center, effective December 1, 2010. The company will initially support 5 jobs with an average annual salary of \$46,000.

"We are extremely excited to relocate our corporate headquarters to Kennedy Space Center and remain committed to growing our Company and business in the State of Florida" stated Glenn Estrella, Sanswire President and CEO. "This move is an unparalleled strategic opportunity for the company to be located next door to world renowned technological facilities and personnel. We believe our access to the resources at the Kennedy Space Center will enable us to accelerate the development and testing of our UAV airships."

In its work with Sanswire, the EDC, partnering with Space Florida, discussed the opportunities on the Space Coast, addressed operating cost issues, and assisted in the site search that led to the company choosing the KSC location. Sanswire considered other locations in Florida and Arizona before deciding on the KSC site.

"The EDC welcomed the opportunity to assist Sanswire Corporation in locating its product development headquarters at Kennedy Space Center," said Lynda Weatherman, president & CEO of the Economic Development Commission of Florida's Space Coast. "Sanswire represents the future of the aerospace industry, developing products with near space capabilities and applications in defense and homeland security. We look forward to our continued partnership with Enterprise Florida, Space Florida, and NASA to ensure that this promising company chooses to grow on the Space Coast."

The EDC and Space Florida are continuing work with Sanswire, including securing airspace for testing and business financing issues.

"Sanswire is yet another example of an innovative company that has the potential to greatly diversify our state's aerospace economic development base," noted Space Florida President Frank DiBello. "We look forward to supporting their efforts as they establish and grow their operations in Central Florida."

About Sanswire Corp.

Sanswire Corp. (OTCBB: SNSR) is a developer of autonomous, lighter-than-air UAVs capable of carrying payloads that provide persistent security solutions at low, mid, and high altitudes. Sanswire's airships are designed for use by government-related and commercial entities that require real-time intelligence, surveillance, and reconnaissance support for military, homeland defense, border and maritime missions.
